

Ultrasound guided spinal & paraspinal blocks for aesthetists

Tuesday 05 February 2019

Organiser: Dr David Pappin, Torquay

Programme

- 09:30 Registration**
- 10:00 Introduction to spinal sonoanatomy 2G02, 2G03**
Dr David Pappin, Torquay
- 10:15 Epidurals and spinals - the difficult back 2B03, 2G02, 3A08, 3A09, 3B00**
Dr David Pappin, Torquay
- 10:35 Caudals 2D05, 2G02, 3A03, 3A09, 3D00**
Dr Andrew Donovan, Taunton
- 10:55 Refreshment break**
- 11:15 Quadratus lumborum blocks 2G02, 3A03, 3A08, 3A09**
Dr John McDonnell, Galway, Ireland
- 11:35 Lumbosacral plexus blocks 2G02, 2G03, 3A08, 3A09**
Dr David Burckett St.Laurent, Newport
- 11:55 Thoracic paravertebral blocks 2G02, 3A09, 3A10, 3H00**
Dr Paul Trumpelmann, Southampton
- 12:15 Novel Chest Wall blocks 2E02, 2G02, 3A09, 3A10, 3H00**
Dr Duncan Hamilton, Middlesbrough
- 12:35 Lunch**
- 13:35 Workshops**
- 14:50 Refreshment Break**
- 15:10 Workshops continued**
- 16:25 Feedback**
- 16:35 Close**

This seminar covers Domain 1: Knowledge, skills and performance and Domain 2: Safety and quality, of the General Medical Council's 'Good Medical Practice' framework.

Learning objectives:

1. Understand the principles of spinal and paraspinal ultrasound scanning
2. Gain knowledge of techniques to visualise the neuraxial anatomy to help increase success and safety of spinals, epidurals and caudals in 'difficult backs'
3. Gain insight into new techniques to improve safety and efficacy of paraspinal blocks such as lumbar and sacral plexuses, as well as quadratus lumborum, paravertebral and novel chest wall blocks.
