

CORE TOPICS

Glasgow

Friday 23 February 2018

Organisers: Drs Rebecca Jadhav & John Gardner, Glasgow

Location: Teacher Building, 14 St Enoch Square, Glasgow, G1 4DB

Programme

08:45 Registration/tea & coffee

09:25 Welcome *Drs Rebecca Jadhav & John Gardner, Glasgow*

Session 1: Critical care

09:30 Maternal critical care **Domains 1 & 3, 2B06, 3B00**
Dr Katie Lake, Glasgow

10:00 What's new in ICU? **Domain 1, 2C01, 3C00**
Dr Stuart Gillon, Glasgow

10:30 Discussion

10:45 Tea & coffee

Session 2: Airway

11:15 Practical applications of THRIVE/Optiflow **Domain 1, 1B02, 1C02**
Dr Alistair McNarry, Edinburgh

11:45 Awake videolaryngoscopy and the anticipated difficult airway **Domain 1, 2A01, 1B02**
Dr Andrew Dalton, Dundee

12:15 Discussion

12:30 Lunch

Session 3: Orthopaedics in the elderly

13:30 Update in management of fractured neck of femur **Domains 1 & 2, 2A02, 2E01, 2G03-04**
Dr Rachel Kearns, Glasgow

14:00 Frailty & vulnerability in the elderly population **Domains 1 & 2, 1A01, 2A02, 2A05**
Dr Hazel Miller, Consultant Physician in Geriatric Medicine, Glasgow

14:30 Discussion

14:45 Tea & coffee

Session 4: Improving quality of care

15:15 The morbidity and mortality process in Scotland: what's new? **Domains 2 & 4, 1I01, 1I05, 3J00**
Dr Michael MacMillan, Glasgow

15:45 Perioperative medicine: where are we now? **Domains 2 & 3, 1I02, 2A03, 2A07, 2A12**
Dr Laura McGarrity, Kilmarnock

16:15 Discussion & closing remarks

16:30 Close of meeting

Domain 1: Knowledge, skills & performance

Domain 2: Safety & quality

Domain 3: Communication, partnership & teamwork

Domain 4: Maintaining trust

CORE TOPICS

Glasgow

Friday 23 February 2018

Organisers: Drs Rebecca Jadhav & John Gardner, Glasgow

Location: Teacher Building, 14 St Enoch Square, Glasgow, G1 4DB

Learning objectives

Session 1: Critical care

Maternal critical care – *Dr Katie Lake, Glasgow*

1. Explore background of maternal critical care, MCC, and how it is evolving.
2. Understand the most common diagnoses of patients requiring MCC and where and how this is provided.
3. Describe the practicalities and special considerations required for looking after critically ill pregnant and recently pregnant women on the intensive care unit.
4. Examine current strategies to improve and quality control the service we provide to critically ill parturients.

What's new in ICU? – *Dr Stuart Gillon, Glasgow*

1. Appreciate the implications of changes in intensive care training.
2. Understand recent and potential future developments in respiratory support in critically ill patients.
3. Gain an overview of 'new' drugs in the critical care environment.

Session 2: Airway

Practical applications of THRIVE/Optiflow – *Dr Alistair McNarry, Edinburgh*

1. A background to THRIVE.
2. Brief physiological overview of mechanisms of apnoeic oxygenation.
3. Potential indications for THRIVE.
4. Potential failure modes for THRIVE.

Awake videolaryngoscopy and the anticipated difficult airway – *Dr Andrew Dalton, Dundee*

1. Review evidence of predictors of a difficult airway.
2. Explore options for awake techniques.
3. Understand key steps in performing awake videolaryngoscopy.

Session 3: Orthopaedics in the elderly

Update in management of fractured neck of femur – *Dr Rachel Kearns, Glasgow*

1. To recognise the importance of the Scottish Hip Fracture Audit in reducing variation in care, improving patient safety and benchmarking standards.
2. To be up to date with the evidence base behind the use of nerve blocks in patients with hip fracture.
3. To understand the need to expedite surgery where possible, the potential barriers to this, and the situations where it is appropriate to delay surgery to allow correction of remediable, serious abnormalities.

Frailty & vulnerability in the elderly population – *Dr Hazel Miller, Consultant Physician in Geriatric Medicine, Glasgow*

1. To understand the technical meaning of the term Frailty.
2. To gain knowledge of the different models used to conceptualise Frailty.
3. To gain insight into how assessing a patient's Frailty status can aid clinical management.

Session 4: Improving quality of care

The morbidity and mortality process in Scotland: what's new? – *Dr Michael MacMillan, Glasgow*

1. Strong local processes drive change.
2. The morbidity and mortality process is uniquely situated at the centre of clinical governance.
3. The gap between specialties is the next step in preventing avoidable patient morbidity.

Perioperative medicine: where are we now? – *Dr Laura McGarrity, Kilmarnock*

1. Describe POM Leadership and priorities within RCoA and in Scotland.
2. Define Prehabilitation: describe Scottish Workstreams for Lifestyle, Frailty & Anaemia.
3. Discuss Shared Decision Making as a priority within healthcare and available training.
4. Describe collaboration with QuEST (Scottish Government) on Enhanced Recovery.
5. Discuss RCoA POM Curriculum & Training & identify areas for further development within POM.
