

CORE TOPICS

Newcastle

Wednesday 14 March 2018

Organiser: Dr Upma Misra, Sunderland

Location: Civic Centre, Newcastle

Programme

- 08:45 Registration/tea & coffee
- 09:25 Introduction
Dr Upma Misra, Sunderland
- 09:30 The anxious child **Domain 1, 2A03, 2D02**
Dr Stephanie Bew, Leeds
- 10:00 Setting up an orthogeriatric service **Domain 2, 1I02**
Dr Faye Wilson, Orthogeriatrician, Sunderland
- 10:30 Discussion
- 10:45 Tea & coffee
- 11:15 Prehabilitation in the general surgical patient **Domain 1, 2A03**
Assoc Prof Susan Moug, Consultant Surgeon, Glasgow
- 11:45 Teaching the art of epidural anaesthesia **Domain 1, 2H01, 3B00**
Dr Nuala Lucas, London
- 12:15 Discussion
- 12:30 Lunch
- 13:30 Your AAGBI (Connecting with members)
- 13:45 Neuromuscular blockade **Domains 1 & 2, 1A03, 2A06**
Prof Thierry Girard, Basel, Switzerland
- 14:15 Wrong site block: how will you prevent yours? **Domains 2 & 3, 2G01, 2G02**
Dr Paul Townsley, Nottingham
- 14:45 Discussion
- 14:55 Tea & coffee
- 15:15 Endpoints in trauma resuscitation: microshock **Domain 1, 1A02, 3A10**
Dr Andre Vercueil, London
- 15:45 Sharpening the mind: the science and philosophy of trauma surgery **Domains 3 & 4, 1I02, 3J00**
Mr Will Eardley, Trauma & Orthopaedics Surgeon, Middlesbrough
- 16:15 Discussion
- 16:30 Close

CORE TOPICS

Newcastle

Wednesday 14 March 2018

Organiser: Dr Upma Misra, Sunderland

Location: Civic Centre, Newcastle

Domain 1: Knowledge, skills & performance

Domain 2: Safety & quality

Domain 3: Communication, partnership & teamwork

Domain 4: Maintaining trust

Learning objectives

The anxious child - *Dr Stephanie Bew, Leeds*

1. To understand why children are anxious and why this is important.
2. To develop simple non pharmacological strategies to use during preoperative assessment and in the anaesthetic room.
3. To understand the pros and cons and use of premedication in children.

Setting up an orthogeriatric service - *Dr Faye Wilson, Sunderland*

1. To understand the national policies and drivers supporting the development of orthogeriatric services.
2. To understand the evidence base supporting orthogeriatric medicine.
3. Description of one local orthogeriatric service redesign and how this has changed outcomes.

Prehabilitation in the general surgical patient - *Assoc Prof Susan Moug, Consultant Surgeon, Glasgow*

1. Defining prehabilitation.
2. Evidence that prehabilitation changes outcomes.
3. How you can prehabilitation your patients.

Neuromuscular blockade - *Prof Thierry Girard, Basel, Switzerland*

1. To understand the advantages and risk of neuromuscular blockade.
2. To understand the importance of postoperative neuromuscular recovery.
3. To understand the intra and postoperative neuromuscular monitoring.
4. To understand intubation of neuromuscular blockade.

Teaching the art of epidural anaesthesia - *Dr Nuala Lucas, London*

1. To understand the barriers to training in epidural analgesia /anaesthesia.
2. To understand training strategies available for epidural analgesia /anaesthesia.
3. To understand potential strategies to assess competence in epidural analgesia anaesthesia.

Wrong site block: how will you prevent yours? - *Dr Paul Townsley, Nottingham*

1. To understand the human factors in anaesthetic practice.
2. To understand the principles of performing local, regional and neuraxial techniques.
3. To recognise and manage the side effects and complications of regional anaesthesia.

Endpoints in trauma resuscitation: microshock - *Dr Andre Vercueil, London*

1. To understand trauma systems.
2. To identify the markers of trauma outcomes.
3. To identify the future markers of trauma outcomes.

Sharpening the mind: the science and philosophy of trauma surgery - *Mr Will Eardley, Trauma & Orthopaedics Surgeon, Middlesbrough*

1. To develop an understanding of the unique environment of deployed surgical care.
2. To have a broad understanding of basic science of military surgery.
3. To establish a desire to engage with large trauma datasets and surgical research.
