

# Update in the perioperative management of patients requiring colorectal surgery

Monday 19 March 2018

Organisers: Dr Nicholas Levy, Bury St Edmunds & Dr William Fawcett, Guildford

## Programme

10:00 Registration & coffee

10:20 Introduction

### Session 1: The elective patient

Chair: Dr Nicholas Levy, Bury St Edmunds

10:30 The enhanced recovery pathophysiology and pathways **1L02, 1L05**  
Dr William Fawcett, Guildford

11:00 Multimodal prehabilitation **2A03**  
Prof Gerry Danjoux, Middlesbrough

11:30 Intra-operative management **2A04, 2E01, 2G01**  
Dr William Fawcett, Guildford

12:00 Utilising perioperative medicine to promote safe hospital discharge **1A02, 1L05**  
Dr Fay Gilder, Cambridge

12:30 Discussion

12:40 Lunch

### Session 2: The emergency patient

Chair: Dr William Fawcett, Guildford

13:40 QI programmes for emergency laparotomy **1L05**  
Dr Nial Quiney, Guildford

14:10 NELA-update **2A06-07, 2E01**  
Dr Sarah Hare, National Clinical Lead for National Emergency Laparotomy Audit

14:40 Intra-operative and perioperative management **2A03-04, 2G01**  
Dr John Berridge, York

15:10 The elderly patient **2A12**  
Dr Nial Quiney, Guildford

15:40 Discussion

15:50 Depart

This one day seminar will update the delegate on the current consensus management of patients requiring both elective and emergency colorectal surgery. For the patient requiring elective surgery, advances in prehabilitation and enhanced recovery techniques will be discussed. For the emergency patient, data from the national emergency laparotomy (NELA) audit project will be discussed, as well as the implications. The different pain strategies will also be discussed. All speakers are national experts in their fields. The seminar aims to add to delegates understanding of the similarities, but more importantly the differences between the management of patients requiring anaesthesia for both elective and emergency colorectal surgery.
