- 16:15** Close of meeting

Meeting kindly sponsored by:

Learning objectives

What is new in airway management? *Dr Radhakrishna Subrahmanyam, Coventry*

1. Videolaryngoscopes: How to select a videolaryngoscope for your trust. - Selecting a Videolaryngoscope has become a challenge considering the variety of VL that are available, the infection control policies that influence choice, costs involved and the single use vs. reusable debate. The discussion is to help you make an informed choice.
2. Optiflow- Rediscovering the wonders of oxygen. A brief look at apnoeic oxygenation and how it could be used in your practice.
3. Tips on airway management and oxygenating the morbidly obese. Simple tips to manage airway in the morbidly obese and understanding the challenges of keeping them oxygenated.

TIVA – Association of Anaesthetists and SIVA guidelines *Dr Alastair Nimmo, Edinburgh*

1. To understand why it is important that all anaesthetists are able to administer TIVA competently and safely.
2. To be familiar with the main recommendations of the Guidelines for the safe practice of total intravenous anaesthesia (TIVA).
3. To be aware of the common problems that may arise during the administration of TIVA and how they may be avoided.

Application of military anaesthesia to civil anaesthesia *Dr Martin Dresner, Leeds*

1. Understand the military approach to trauma medicine from the point of injury onwards.
2. Understand the Training structure for Drs in the British Army.
3. Draw lessons from the above to aid civilian practice.

Peri-operative haemoglobin management *Dr Manik Chandra, Leeds*

1. Physiology of iron absorption
2. Adverse outcomes associated with peri-operative anaemia
3. Current guidance on peri-operative anaemia
4. Treatment options for peri-operative anaemia

GDPR: Essentials for NHS and non-NHS work *Dr John McElwaine, Leeds*

1. Understand the basics of good Information Governance.
2. Understand what patients should be told about the use of their data.
3. Understand the difference in approach for NHS and private practice.

Paediatric management for adult anaesthetists *Dr Joe Mellor, Leeds*

1. Develop strategies for difficult anaesthetic situations that develop in paediatric patients.
2. Improve understanding of practical issues surrounding consent in children.
3. Introduce sources of guidance of relevance and importance to occasional paediatric practice.
