### Learning objectives

- 09:30**      **Responding to a terrorist event - what anaesthetists need to know** **1I02, 3A10**  
Dr Sarah Thornton, Royal Bolton Hospital, Bolton
- To understand the immediate response required following declaration of a major incident and the psychological and other management of staff in the recovery phases after an event.
- 10:00**      **Management of out of hours acute airway obstruction** **1B02, 2A02**  
Prof Anil Patel, Royal National Throat, Nose and Ear Hospital, London
- To appreciate the potential for acute airway emergencies and understand strategies for avoidance and management of acute airway complications.
- 10:30**      **Pacemakers and other cardiac devices – what all anaesthetists should know** **2A03, 2A12**  
Dr Paul Roberts, Southampton General Hospital, Southampton
- To understand the range of implantable cardiac electronic devices and the management of anaesthesia for patients in the context of the presence of these devices.
- 11:00**      **Pseudomyxoma surgery and lessons for the management of other major surgical cases** **2A03, 2A07**  
Dr John Bell, Basingstoke and North Hampshire Hospital, Basingstoke
- To appreciate the unique aspects of anaesthesia management for patients with an extremely unusual condition and how these might inform management of anaesthesia for other very complex cases.
- 12:00**      **Anaphylaxis and allergy in anaesthesia** **1B01**  
Dr Linda Nel, Southampton General Hospital, Southampton
- To understand the current state of the art of anaphylaxis and allergy management and investigation for patients undergoing general anaesthesia.
- 12:30**      **Legal & ethical considerations for anaesthesia of children** **1F01, 2D02, 2D06**  
Mr Robert Wheeler, Southampton General Hospital, Southampton
- To appreciate the nuances of the legal and ethical status of children and how this should inform the anaesthesia and surgical management of children
- 13:00**      **Training tomorrow's anaesthetists** **1H01, 2H01-02**  
Dr Ian Taylor, Queen Alexandra Hospital, Portsmouth
- To understand the current state of medical education for anaesthesia and the potential developments, pitfalls and challenges that are likely to face anaesthesia training in the future.
- 13:30**      **Acute pain management of opioid-tolerant patients** **1D02, 2E03**  
Dr Mark Jackson, Royal Devon and Exeter Hospital, Exeter
- To understand the prevalence together with the likely issues related to the peri-operative management of opioid tolerant patients and potential management strategies that may be employed for this patient group.
