Instructions for use

Location of emergency equipment and drugs

Section 1: 'Key basic plan'

A single guideline for a crisis where signs, symptoms and underlying problem are not clear
(v.1)

Section 2: 'Unknowns'

Guidelines for crises manifesting as signs or symptoms, where diagnosis and treatment are commonly simultaneous

2-1	Cardiac arrest	(v.1)
2-2	Hypoxia/desaturation/cyanosis	(v.1)
2-3	Increased airway pressure	(v.1)
2-4	Hypotension	(v.1)
2-5	Hypertension	(v.1)
2-6	Bradycardia	(v.1)
2-7	Tachycardia	(v.1)
2-8	Peri-operative hyperthermia	(v.1)

Section 3: 'Knowns'

Guidelines for crises where a known or suspected event requires treatment

3-1	Anaphylaxis	(v.5)
3-2	Massive blood loss	(v.2)
3-3	Can't intubate, can't oxygenate (CICO)	(v.1)
3-4	Bronchospasm	(v.3)
3-5	Circulatory embolus	(v.1)
3-6	Laryngospasm and stridor	(v.1)
3-7	Patient fire	(v.1)
3-8	Malignant hyperthermia crisis	(v.2)
3-9	Cardiac tamponade	(v.1)
3-10	Local anaesthetic toxicity	(v.2)
3-11	High central neuraxial block	(v.1)
3-12	Cardiac ischaemia	(v.2)
3-13	Neuroprotection following cardiac arrest	(v.1)
3-14	Sepsis	(v.1)

Section 4: 'Other'

Guidelines for crises external to, but posing risk to the patient

4-1	Mains oxygen failure	(v.1)
4-2	Mains electricity failure	(v.1)
4-3	Emergency evacuation	(v.1)
